

Scope of the Project

1. Overview of the Project

The Fast Travel Co. is interested in developing a fully functioning, user-friendly, and modern online travel platform that meets the ever-growing needs of travelers for an enhanced customer experience. This should include comprehensive travel information, personalized services, secure booking systems; thus, it should result in increased customer satisfaction and business efficiency.

2. Objectives

- Provide intuitive user experience.
- Increase revenue through online sales, especially in travel packages and value-added services.
- Establish a robust online brand presence to increase customer loyalty and encourage word-of-mouth marketing.
- Ensure the adaptation of technology and content according to global market demands

3. Stakeholder

- Travel Company Management: Ensures that the project aligns with business objectives
- Customer Support Team: Provide input on user needs and support needs
- IT and Technical Support Teams: Ensuring the system is reliable, performs well
- End Users (Tourists): Leisure and Business Travelers, Trip Planners using the site.

4. Target Audience

- Leisure travelers, who search for the best deals on vacation and holiday destinations.
- Business Travelers: Many business travelers need to book quickly and flexibly.
- Trip Planners: Need customized itinerary planning.
- 5. User Requirements Navigate and filter/search with ease and speed.
- Display personalized recommendations on travels, along with the facility for itinerary planning.
- Provide options for online payment, secure and easy booking.
- Multilanguage for a wide global reach.

2. Non-Functional Requirements Performance:

- Page load time should be less than 2 seconds, allowing high concurrency of users.
- Usability: The interface should be simple to reduce the learning curve for users as much as possible. Scalability: The system design must accommodate increased demand by users and more reservations.
- Reliability: The target shall be 99.9% uptime, with minimum disruption for maintenance.
- Security: Provide very strong security measures, such as data encryption, firewall protection, and so on.
- Compliance: Comply with relevant global privacy regulations such as GDPR, and security regulations such as PCI-DSS.

8. Project Deliverables

- User-friendly website design and interface: The booking and payment system should be integrated. Algorithm of personalized recommendations Multilingual and multi-currency support features.

9. Requirements and Features Included

- Ease for User Navigation: Ease and simplicity in search and navigation.
- Vacation Packages: Ability to display various vacation packages depending on user preference.
- Itinerary Planning Tool: Facility for users to create an itinerary and make changes in it.
- Secure Payment Gateway: Online payment facility to be integrated securely.
- Multi-lingual: Content to be available in multiple languages.
- User Reviews: Users should be allowed to read and write reviews about the services and packages.

Time schedule for development steps

Phase 1: Requirements Gathering and Analysis, 4 Weeks

Week 1:

- Conduct stakeholder interviews to gather detailed requirements.
- Create user personas based on identified target audiences.
- Analyzing competitor platforms to identify the best practices and features that could be implemented.
- Document the functional and non-functional requirements.

Week 3:

- Prioritize the features and requirements based on the input provided by stakeholders and the market analysis.
- Prepare the SRS for review.

Week 4:

- Review and finalize the requirements with stakeholders.
- Get the sign-off on the requirement specification.

Phase 2: Design and Prototyping (6 Weeks)

Week 5:

- Create wireframes for key pages-homepage, search result page, reservation page, package description page etc.
- Develop the application's user flow diagram to assess how users will progress along the desired conversion paths.

Week 6:

- Design high-fidelity mockups using the developed wireframes.
- Adding branding identity to mock-ups and making them responsive.

Week 7:

- The interactive prototype, based on designed mock-ups, is to be developed for usability testing.

- Usability testing with target users to be conducted to take feedback on behalf of improvements.

Week 8:

- Conduct the analysis of the received feedback from usability testing.
- Make all necessary adjustments to the developed design according to users' input.

Week 9:

- Lock the design and prepare design specifications for development.
- Stakeholder sign-off on final designs.

Phase 3: Development, 10 Weeks

Week 10-11:

- Setting up the development environment and version control.
- Designing the DB schema and back-end API for the application.

Week 12-13:

- Core features to be developed based on the design specifications include user sign-up, login, and profile management.
- Search and booking features development to be initiated.

Week 14-15:

- In order to fully develop the booking module, integrate it with the online payment gateway.
- Provide personalized travel recommendations to the users based on user profiles.

Week 16:

- Itinerary planning and user review utility development
- Internal testing of the components individually

Week 17-19:

- Integration of all the components and system testing
- Bug fixing and other issues as noticed during testing

4. Phase 4: Testing and Quality Assurance (4 Weeks)

Week 20:

- Functional testing to ensure that the functionality works as designed
- Performance testing to get an appreciation of the load times and scalability

Week 21:

- Perform security testing regarding identifying vulnerabilities and data protection.
- Perform UAT with selected end users.

Week 22:

- Gather feedback from UAT and implement changes if necessary.
- Regression testing, to ensure features already working are not impacted by changes.

Week 23:

- Finalize all test documentation and compliance to meet the requirements of regulatory bodies.
- Prepare for deployment.

Phase 5: Deployment (2 Weeks)

Week 24:

- Deploy the platform to a production environment.
- Perform the final round of testing in the production environment for confirmation of stability.

Week 25:

- Release the platform for general usage.
- Start marketing campaigns to increase the visibility of the new platform.

Phase 6: Post-launch Support and Training

Week 26:

- Monitoring of the platform post-launch will be done.

- The gathering of customer support and user feedback for future improvements will be entertained.
- Give a rough plan for future updates and feature enhancements based on user requirements.

Estimated Project Costs

The estimated cost for different activities during the project are:

Estimated Hours by Phase

1) Phase 1: Requirements Gathering and Analysis (4 Weeks)

- Week 1: 40 hours
- Week 2: 20 hours
- Week 3: 20 hours
- Week 4: 20 hours
- Total: 100 hours

2) Phase 2: Design and Prototyping (6 Weeks)

- Week 5: 40 hours
- Week 6: 40 hours
- Week 7: 40 hours
- Week 8: 20 hours
- Week 9: 20 hours
- Total: 160 hours

3) Phase 3: Development (10 Weeks)

- Week 10-11: 80 hours
- Week 12-13: 80 hours
- Week 14-15: 80 hours
- Week 16: 40 hours
- Week 17-19: 120 hours
- Total: 400 hours

4) Phase 4: Testing and Quality Assurance (4 Weeks)

- Week 20: 40 hours
- Week 21: 40 hours
- Week 22: 40 hours
- Week 23: 20 hours
- Total: 140 hours

5) Phase 5: Deployment (1 Week)

- Week 24: 10 hours
- Week 25: 10 hours
- Total: 20 hours

6) Phase 6: Post-launch Support and Training (1 Week)

- Week 26: 40 hours
- Total: 40 hours

Total number of hours : 860 hours

Cost Estimation

Assuming an hourly rate of \$50 (you can adjust this based on actual rates):

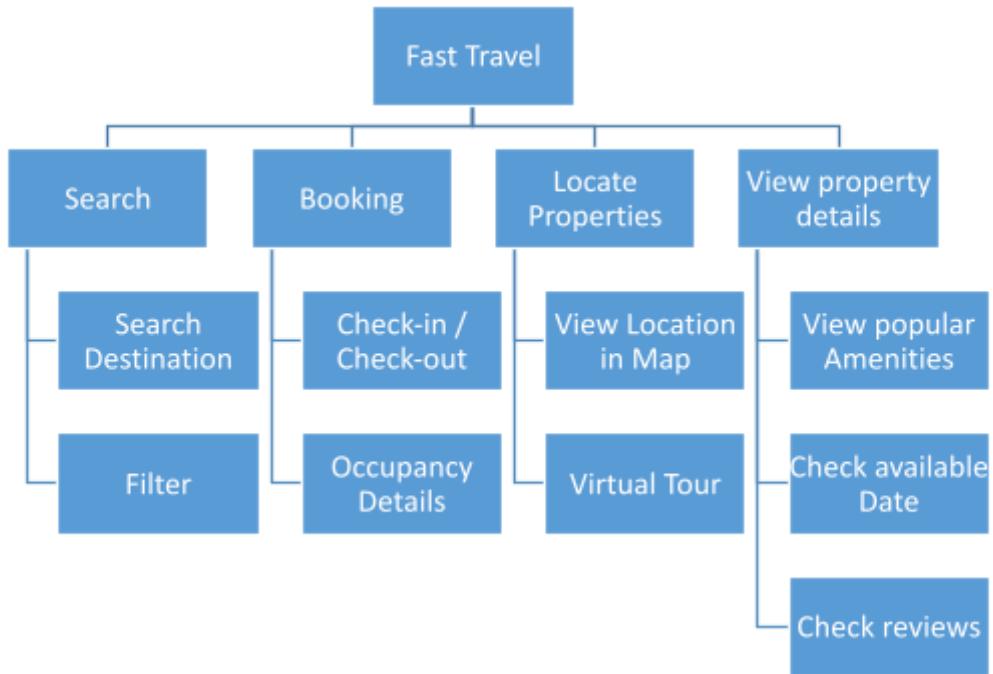

Total Cost = Total Hours × Cost per Hour

TotalCost=860 hours×50 USD/hour=43,000 USD

Final Budget Estimate

- **Total Estimated Hours:** 880 hours
- **Estimated Cost:** \$44,000

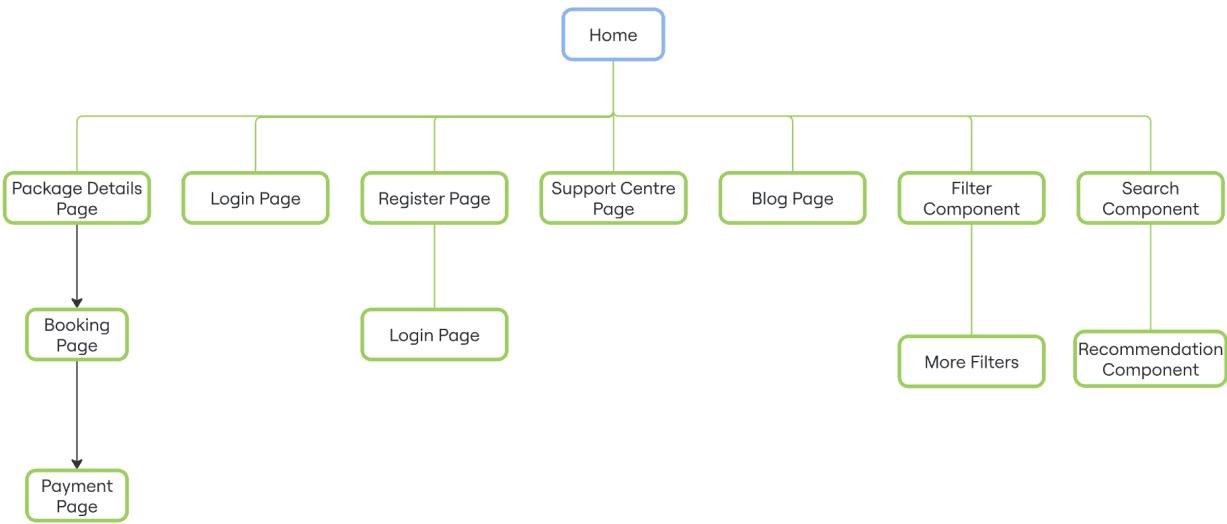

Functional Decomposition

Non-functional design consideration

1. Responsiveness & Performance
 - a. The page loads quickly, within 2-3 seconds
 - b. All the elements are responsive and can be viewed in all devices
 - c. High-resolution images are lazy-loaded, and videos of virtual tours are streamed.
2. Usability
 - a. Clean design and accessible elements make the navigation easy
 - b. Pages are disability-friendly with keyboard navigation and screen readers
3. Security
 - a. The site is secured with SSL encryption to prevent man-in-the-middle attack
 - b. Payment information and personal data from users are secured, passwords are hashed and encrypted and server is secured with proper access control and restriction
4. Scalability
 - a. The system can handle 10,000 concurrent users
 - b. Additional properties and amenities can be added in the future
5. Branding & Aesthetics
 - a. The site has consistent font, design elements and colors that aligns with brand identity
 - b. High-quality images and videos of the property creating professional appearance
6. Compliance
 - a. Compliance with major global privacy and security regulations such as GDPR, PCI-DSS.

Sitemap showing relationship between pages

User Document

1. Create Account & Login

Create an account by clicking the signup button and login to the account.

2. Search for desired destination

Enter the destination in the search bar and fill in other details like, check-in checkout date and number of guests

3. Filter

Narrow search results by selecting the appropriate accommodation (e.g. House, hotel, villa, and apartment) and further fine tune results with more filter toggle component

4. View destination details

Click on the preferred travel destination. Detailed information of the destination including amenities, virtual tour, available dates and reviews are included.

5. Booking

Enter the check-in and checkout date, number of guests, your phone number and optionally a note and submit the information.

6. Payment & Confirmation

After arriving at the payment page, enter details of your preferred payment method credit/debit card or PayPal and complete the booking.

Reviews

Wade Warren 

From the moment we arrived, everything was seamless and well-organized. The tours were breathtaking, and the local guides were knowledgeable and welcoming. Truly an unforgettable experience that I can't wait to relive!

Cameron Williamson 

This trip exceeded all our expectations! The itinerary was thoughtfully planned, balancing adventure and relaxation perfectly. We felt completely taken care of and got to experience hidden gems we would've missed on our own.

Ronald Richards 

This was the best vacation we've ever had! The accommodations were comfortable, the destinations were spectacular, and the customer service was outstanding. I highly recommend this agency to anyone looking for a memorable travel experience.

The wireframe shows a dark-themed landing page for a travel booking platform. At the top, there's a header with a logo, a 'Register' button, and a 'Sign-in' button. Below the header is a main title 'Your Next Destination Awaits'. Underneath the title is a search bar with fields for 'Where is your next destination?', 'Check-in Date — Check-out Date', 'No. of guests', and a 'Search' button. Below the search bar is a filter section with categories: House (selected), Hotel, Villa, Apartment, Camp House, and a 'More Filters' button. The main content area displays a grid of 12 destination cards, each showing a placeholder image, the destination name, guest count, room details, price from, and a rating of 4.6 stars. The cards are arranged in three rows of four. At the bottom of the content area is a 'Show more' button.

 Wade Warren

From the moment we arrived, everything was seamless and well-organized. The tours were breathtaking, and the local guides were knowledgeable and welcoming. Truly an unforgettable experience that I can't wait to relive!

 Cameron Williamson

This trip exceeded all our expectations! The itinerary was thoughtfully planned, balancing adventure and relaxation perfectly. We felt completely taken care of and got to experience hidden gems we would've missed on our own.

 Ronald Richards

This was the best vacation we've ever had! The accommodations were comfortable, the destinations were spectacular, and the customer service was outstanding. I highly recommend this agency to anyone looking for a memorable travel experience.

Overall Test Plan

4. Testing Strategy

4.1 Functional Testing

Objectives: To ensure that each discrete functionality works as expected.

Methods:

Unit Testing:

This shall be done by developers at the component level.

Integration Testing: Testing the interaction between the matched components like booking component with payment component.

System Testing: This shall test the entire platform from end to end to check if the overall system performs as expected.

Tools: Selenium, JUnit, Postman

4.2 Performance Testing

Objective: To determine the responsiveness and stability of the platform under load

Methods:

Load Testing: To simulate a number of active users in order to find out the performance under expected conditions.

Stress Testing: To simulate usage of the system from multiple users and detect what the system can/can't handle.

Scalability Testing: The platform should be measured for scalability when the users' demands are increasing.

Tools: JMeter, LoadRunner

4.3 Security Testing Objectives:

Identifying the vulnerabilities in the platform and data protection.

Methods:

Vulnerability Scanning: scanning for security vulnerabilities automatically.

Penetration Testing: performing simulated attacks of varied types to identify weaknesses that can be exploited.

Data Protection Testing: User data is correctly encrypted and safe during transmission and storage.

Tools: OWASP ZAP, Burp Suite

4.4 User Acceptance Testing

Objectives: The platform has to be validated by end users for usability and functionality.

Methods:

UAT sessions with a sample size of end users from target audiences will be conducted. Take feedback about ease of navigation, utility of features, and overall satisfaction.

Participants: Real users from target demographics like tourists and frequent travelers.

4.4 Regression Testing

Objectives: New code changes don't affect existing features adversely.

Methods: Automated regression test suites after each major update or bug fix.

Tools: Selenium, TestNG

4.5 Compliance Testing

Objective: To test compliances of applied regulations such as GDPR, PCI-DSS.

Method:

Document review and conduct tests that user consent is collected or data is protected and payment securities are in place.

Documentation Review: Review policies and procedures for compliance alignment.

UAT Test Cases

Objective	Steps Followed	Expected Result
Check if new users can register their account	1) Navigate to Register page 2) Fill in required fields 3) Click "register"	User is registered and redirected to login page
Check if User can Login	1) Navigate to Login page 2) Fill in required fields 3) Click "login"	User is logged in and can view their account and preferences
Verify search functionality is working	Search for a destination in the search bar.	The user can view relevant package and destination details
Filter Results	1) Click on the type of accommodation(house, villa etc.) 2) Click on more filters and check filters like air conditioning, price range, wifi, dedicated workspace etc.	The user is shown destinations/packages according to the filters selected.
View Package Details	1) Click on a specific travel package from the search results.	A detailed page displaying package description, itinerary, pricing, and user reviews is shown along with relevant photos.
Booking a Package	1) Submit the booking form. 2) Proceed to payment and enter payment details. 3) Confirm the booking.	Booking confirmation is displayed, and a confirmation email is sent to the user.

Usability Testing

Objectives	Steps Followed	Expected Results
Navigation from the site's homepage	1) Launch the home page. 2) Click on the property cards, about us link, searchbar	The user can easily locate required information and navigate through the site easily without confusion
Using the search bar	1) Click on the search bar. 2) Type in a sample package name 3) Press "Enter" or click "Search"	The user can see recommended packages and destinations according to the keywords. The website correctly shows the packages according to user entered keywords in the search bar
Booking Process Clarity	1) Enter sample credentials in the booking form of any package	The user can intuitively find all the buttons and understand the booking information.,
Help and Support Access	1) Navigate to the support section. 2) Attempt to find contact forms, contact numbers or emails.	Users can easily locate customer support access.
Responsive design	1) Open the website on a mobile phone, tablet and desktop.	All the important information is clearly displayed in all devices with easy-to-use- UI. The elements should be appropriately sized and positioned

Cross Browser testing

Objectives	Steps Followed	Expected Results
Desktop Browser testing	<p>Open the website in different desktop browsers:</p> <ol style="list-style-type: none">1) Google Chrome (latest version and previous two versions)2) Mozilla Firefox (latest version and previous two versions)3) Microsoft Edge (latest version and previous two versions)4) Safari (latest version, macOS)5) Opera (latest version)	The website and it's features work seamlessly on all browsers in desktop
Mobile browsers testing	<p>Open the website in different mobile browsers</p> <ol style="list-style-type: none">1) Safari on iOS (latest version)2) Google Chrome on Android (latest version)3) Firefox for Android (latest version)4) Opera for Android	The website and it's features work seamlessly on all browsers in desktop
